AMAN

Software Engineering Intern | Full-Stack & Backend Development

Delhi, India | 8377852570 | amanchoudhary782767@gmail.com | LinkedIn | GitHub

SUMMARY

B.Tech Computer Science Engineering student graduating in 2027 with hands-on experience building full-stack and backend applications. Skilled in JavaScript, TypeScript, Python, C, Go, SQL, React.js, Next.js, REST APIs, authentication, authorization, and database development. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and software engineering. Seeking a Software Engineering Internship to contribute to production-ready applications while continuing to grow as a software developer.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C, Java, Go
Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS
Backend & APIs: Node.js, Express.js, Next.js API Routes, Go Gin, REST APIs, JWT, bcrypt
Databases & Storage: PostgreSQL, MySQL, SQLite, Supabase, GORM, SQL, DBMS
Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS
Tools & Platforms: Git, GitHub, VS Code, Vercel, Railway, Postman, Vitest

PROJECTS

Secure Campus Resource Sharing & Moderation Platform

GitHub | Live
Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase Auth, PostgreSQL, Supabase Storage, Vitest, Vercel

- Built a full-stack academic resource platform for uploading, requesting, searching, reviewing, and downloading notes, papers, lab files, and study materials.
- Implemented authentication flows including registration, login, password recovery, and password reset using Supabase Auth.
- Developed admin moderation features to approve, reject, block, delete, and review resources before public visibility.
- Secured private file downloads using Supabase Storage permission checks and short-lived signed URLs.
- Added search and filtering across title, subject, tags, branch, semester, resource type, and summary for efficient resource discovery.
- Improved platform security with file hashing, duplicate upload detection, server-side validation, unsafe-file blocking, daily upload limits, audit logs, blocked-user restrictions, and Row Level Security policies.

School Management API

GitHub | Live
Tech Stack: Node.js, Express.js, MySQL, mysql2/promise, dotenv, Helmet, CORS, Morgan, Railway, Postman

- Built and deployed a REST API to add schools and retrieve schools based on user latitude and longitude.
- Implemented request validation for required fields, latitude, and longitude before inserting records into MySQL.
- Added distance-based sorting using the Haversine formula to return schools from nearest to farthest.
- Used parameterized MySQL queries with mysql2 to reduce SQL injection risk and improve backend security.
- Created the database schema, environment configuration, Postman collection, and deployment-ready setup for testing and hosting.

Golang Backend Authentication Service

GitHub
Tech Stack: Go, Gin, GORM, SQLite, JWT, bcrypt

- Built a backend authentication service with signup, login, protected profile, and admin-only user-list endpoints.
- Implemented bcrypt password hashing and JWT-based authentication for secure credential and session handling.
- Added role-based access control for users and administrators, including admin-secret validation during signup.
- Used GORM with SQLite to manage user records including ID, name, email, hashed password, role, and created_at.
- Created middleware-based route protection to validate JWT tokens and restrict access to protected and admin-only endpoints.

EDUCATION

Bachelor of Technology in Computer Science Engineering
Delhi Skills and Entrepreneurship University, Delhi, India | Expected Graduation: 2027 | Current CGPA: 7.0/10
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering

LEADERSHIP & ACTIVITIES

- **Class Representative | 3+ Years (Present):**Serving as Class Representative for over three years, acting as a communication bridge between students and faculty. Coordinate academic updates, student concerns, class activities, and faculty communication while maintaining effective working relationships with students and teachers.
- **Head, Tech-Spark Coding Society:**Lead technical initiatives, coding activities, and student developer engagement across campus.
- **Placement Coordinator:**Coordinate placement-related activities and manage placement database-related tasks, including maintaining and organizing student information.
- Participate in college debates and public speaking activities, strengthening communication, presentation, and interpersonal skills.
